TRANSPORT

PROJECT MANAGEMENT SERVICES

Lambert Smith Hampton's dedicated Transport team offers specialist advice to achieve the optimum Project Management solution to the Transport (Rail, Aviation, Bus & Coach) Sector. Projects range from full infrastructure redevelopments to specialist system installations.

KEY SERVICE LINE - PROJECT MANAGEMENT

Project management of a variety of building refurbishment, demolition, new build and redevelopment schemes in the transport sector including:

- New railway stations
- New bus depots
- Railway station refurbishments
- Passenger facility enhancements
- Railway depot refurbishments
- Transport interchanges
- Station Information & Security System (SISS) installations
- Revenue protection schemes
- Depot plant installations
- New station car parks & extensions
- Station retail developments

SPECIALIST SERVICES

- Project Management of automatic ticket gate schemes with experience at over 160 rail stations
- Sustainable Project Management solutions, including ESG integration and sustainable technologies such as PV, rainwater harvesting and energy efficient installations

WHY CHOOSE LSH?

- **Specialist expertise** - with understanding of operational transport considerations, backed up by the commercial strength and breadth of a top national surveying practice.
- **Dedicated Transport team** - gives our clients the option to easily expand service provision across our divisions with unrivalled UK coverage.
